

TrustBase Product

1. Product Overview

TrustBase is a digital platform designed to help users verify individuals and businesses before sending money. The goal is to reduce scams and increase trust in Nigeria's digital economy.

2. Problem Statement

Many users fall victim to fraud because there is no simple way to check if a person or business is trustworthy before making payments.

3. Solution

TrustBase provides a searchable system where users can view trust scores, reviews, and reports about individuals or businesses before transacting.

4. Target Users

- Online buyers and sellers
- Freelancers and clients
- Small business owners
- Everyday mobile money users

5. Core Features (MVP)

- User authentication (Signup/Login)
- Search by name, phone number, or business
- Trust score display
- Reviews and ratings system
- Scam reporting system

6. User Flow

1. User opens the app
2. User signs up or logs in
3. User lands on dashboard
4. User searches for a person or business (User can also report a business or individual, phone number or business profiles (facebook, tiktok, telegram, instagram etc usernames if its not already in our database))

5. System displays trust score and reviews
6. User can leave a review or report a scam

7. Screens Breakdown

Splash Screen: Displays logo and tagline to introduce the app.

Login/Signup: Allows users to create an account or log in securely.

Dashboard: Main screen with search functionality and recent checks.

Search Results: Displays list of people/businesses with trust scores.

Profile Page: Shows detailed trust score, reviews, and reports.

Leave Review: Users can rate and comment on their experience.

Report Scam: Users can report fraudulent behavior.

8. Trust Score Logic (Basic Idea)

Trust score is calculated based on user reviews, reports, and activity history.

- Positive reviews increase score
- Scam reports decrease score
- More data improves accuracy

9. Design Direction

Primary Color: Red (#E53935) – used for alerts and key actions

Secondary Color: Dark Gray (#333333) – used for text and structure

Background: Light Gray/White – keeps interface clean

Green: Indicates safe or trusted profiles

10. UX Principles

- Keep the interface simple and clean
- Highlight risk clearly using red
- Make search fast and central
- Ensure trust score is highly visible
